TITLE : MANUFACTURE OF DOUBLE-SIDED
PRINTED BOARD

ABSTRACT : PURPOSE: To easily connect conductors on both sides of a board by adhering patternlike conductors on both side surfaces of an insulating board having through holes, and then welding the conductors via the holes.

CONSTITUTION: Patternlike conductors 2 temporarily adhered to the surface of plastic films 3 are disposed on both side surfaces of an insulating board 1, transfer-adhered onto the board 1, and then films 3 are peeled. After the conductors 2 are transfer-adhered onto both side surfaces of the board 1, the conductors 2 are held by an electrode 7 in the hole 4, and adhered by resistance welding.
